## Projects

---

### Medicine Remainder using Arduino UNO

(10/2019 - 12/2019)

It is a project that helps a person to keep a reminder for taking medicines on time without any delay. For this, Arduino UNO is the basic requirement

### Passport status Tracking System (09/2021 - 12/2021)

This project deals with tracking the status of applied passport. Here we used Visual Studio 2017 to design the interface and SQL Server to run the code and get the desired output

### Three step Password Authentication System.

(09/2021 - 12/2021)

A project that has 3 step password protection.

### Credit Card Fraud Detection. (03/2022 - 05/2022)

In this project, we try to detect if a credit card transaction is legitimate or not. Here, the tools we used are Google Collab and few Machine Learning Algorithms, and Python for coding.

## Languages

---

English, Hindi, Telugu, Kannada
